## MISSION

At RLJK, we design lighting (lumens), energy (joules) and electrical (kilowatts) systems which create value for our clients. With increasing energy demand and rising costs, RLJK can help by designing cost-effective, energy-efficient alternatives.

Our top-quality engineering consulting services combine a high degree of professional experience and knowledge with a flexible, customer-oriented business model. We believe that good communication and quality work are the key to creating high client satisfaction.

## MARKETS

Our expertise allows us to serve a client base which covers many industries, including architectural, commercial, industrial and governmental. We successfully serve both small and large businesses. Our design teams consist of highly trained staff with a wealth of experience and credentials to include licensing in all 50 states.

RLJK's portfolio spans a wide range of projects, from a small business' renovation of a single obsolete system, to new construction of a large facility which needs complete indoor and outdoor electrical planning for a host of systems.

## SERVICES

### Electrical Distribution and Lighting Design

Our Professional Engineers use the latest technological advances to maximize value for our clients through increased energy efficiency and reduced energy costs. We bring innovative ideas, a high standard of communication and cooperation, and professional expertise to our designs.

### Life Safety and Communications Systems Design

Complex systems including fire alarms, technology and energy monitoring equipment demand up-to-date expertise in order to design plans for optimal performance. RLJK's engineers have the experience and knowledge to create designs which meet code specifications, accommodate specific client needs and significantly contribute to achieving safety and security goals.

### Specialized Services

We pride ourselves on our ability to meet clients' unique needs. Our services can be tailored to fit your special projects in the following areas:

- Research
- Surveys
- Reports

We work as a partner with you, to significantly contribute to your project's efficiency, cost savings, safety and security. Contact RLJK today to discover more about the value we offer in engineering services.
